MEMBER

Introduction

Welcome to *The Sourcing Guide*

Electronics Sourcing's handy A5-size *Sourcing Guide* has been updated and reprinted for 2018. Designed to help purchasing professionals find new and alternative suppliers, the free *Guide* is divided into two distinct sections.

From the front cover to page 64, buyers are introduced to a plethora of electronics products and services. Categories include: Broadline Distribution, Connectors and Cabling, Contract Manufacturing, EMC, Enclosures, Excess Inventory Management, Frequency, ICs and Semiconductors, Obsolescence, Passives, PCB, Power and Batteries, RF Connectors, Training and Thermal Management.

From page 65 onwards, we dig deeper, offering selection charts which breakdown components and services into greater detail. For example, Frequency Management is broken down by crystals, oscillators, programmable oscillators, resonators, VCOs and VCXOs.

Our goal is to help purchasing professionals make informed buying decisions and we are confident *The Sourcing Guide* will play its part.

Make it easy

We appreciate that sourcing products isn't your passion. That's why we make it as simple as possible.

With online product comparisons, videos and datasheets, you can quickly find the products that work best for you, saving you time, money and hassle.

Find the right parts at

uk.rs-online.com

Challenge our Quotes team today

- Price stability
- Rapid response
- Competitive pricing on large quantities
- Inventory management

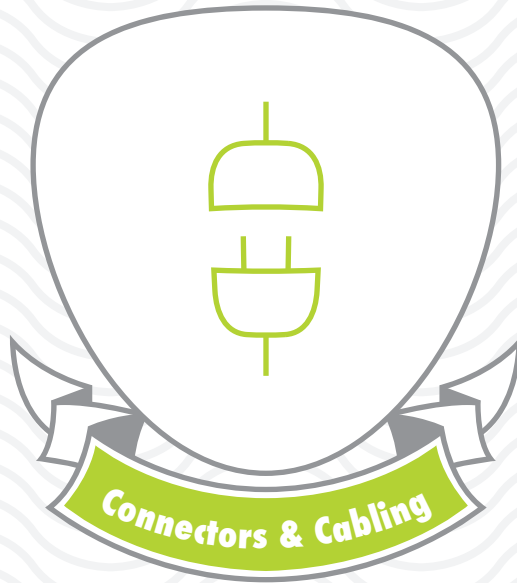

Not in the catalogue? Above our end column? Not a problem! We welcome the chance to beat your current prices by quoting you on volume orders, sourcing items from our suppliers' extended ranges or those not available in our product catalogue. We will hold quotes for 30 days, protecting you against future price rises. Contact our dedicated quotes team today to save money on large quantities. Alternatively using our online quotation service could not be easier.

SEARCHING FOR THE IDEAL ENCLOSURE?

KNOW YOUR OPTIONS

➤ STANDARD ENCLOSURES

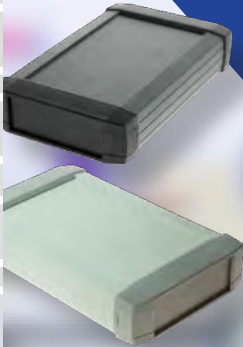

We have an extensive range of off-the-shelf enclosures. Standard enclosures are ideal when time is of the essence, our enclosures are readily available for fast turnaround volume orders.

➤ CUSTOMISED ENCLOSURES

We can take all standard enclosures and customise them to your requirements using our in-house CNC machine centre. Give your enclosure the character it deserves with our enhancing digital printing service that improves the appearance of ANY enclosure.

➤ CUSTOM ENCLOSURES

Utilising our smartboxx and smartmould technologies, we work with you, so that you're in full control of your design from concept to manufacture.

RETRONIX

OBSOLESCENCE SOLUTIONS

Reclaim High value IC's from obsolete, damaged or old revision PCB's

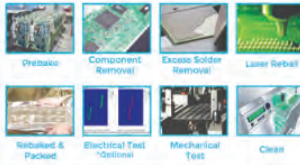

Retronix have developed a process to recover IC's including BGA's, to enable them to be re-used. This process meets the manufacturers specifications and this process has been used extensively by both OEM's and CEM's.

BGA - SAFE RECOVERY PROCESS

- 1) Each PCB is prebaked to JEDEC Standards
- 2) BGAs are removed using bottom heat only, this avoids reflowing the body.
- 3) Solder is removed in a controlled hot air process. No Abrasion.
- 4) BGA is Laser Reball.
- 5) Components are cleaned in an automated process.

Then mechanically tested, baked, vacuum sealed and packed.

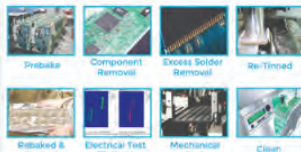

Combining our rework, retinning, reballing, ICOS coplanarity testing, electrical testing and repackaging services we have a full suite of processes to enable us to safely recover, re align, re tin/ball and test your devices to give you piece of mind that the part is fully functioning when you receive it back for use in new production or the service and support of current products.

LEADED DEVICES - SAFE RECOVERY PROCESS

- 1) Each PCB is prebaked to JEDEC Standards
- 2) Devices are removed using bottom heat only, this avoids reflowing the body.
- 3) Excess solder is drained from the legs of the device.
- 4) Device is retinned.
- 5) Device is mechanically checked for coplanarity etc. in the vision system.
- 6) Components are cleaned in an automated process.

Then tested, baked, vacuum sealed and packed.

We are happy to carry out free of charge samples to assist you to prove the process and the benefits to your company.

Your *Ultimate* Battery Partner

With over 30 years' experience in the battery industry **DMS technologies** understands that today's market requires more than just a battery supplier. Successful organisations require a battery partner to fully understand their requirements and provide solutions that combine physical, electrical and financial demands.

Multiple Battery Chemistries

As a leading specialist with experience in all of the leading battery chemistries we are able to support your organisation with high quality, cost effective, battery power solutions. We understand that in today's tough market place costs need to be reduced without compromising on quality. Our contacts across the industry mean that we are at the leading edge of available technologies and can often reduce costs on new and existing projects.

Battery Pack Building & Custom Design

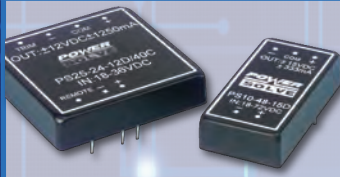

We started life as a battery pack manufacturer and remain the leading UK pack builder. We still manufacture large numbers of our original Cyclon battery packs and have gradually added more and more technologies and manufacturers. Using lithium, alkaline and NiMH cells we now build packs for applications ranging from Oil & Gas to Rail to Lighting. We can offer a basic shrink wrap solution to a fully moulded plastic casing with specific connection sockets.

DMStechnologies

Powersolve Power Products

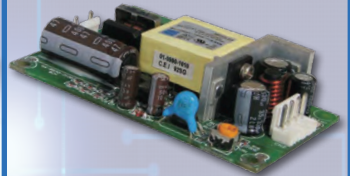

Power & Batteries

DC-DC Converters

High Density DC-DC

AC-DC Low Power

DIN Rail Mounting

AC-DC Higher Power

Ruggedized Power

Ruggedized Power

External Power Supplies

Batteries

Battery Backed DC Power

Inrush Current Limiters for LED lighting & other loads where high inrush current is a problem

Battery Chargers all types

AC UPS for critical power systems

DC-AC Inverters

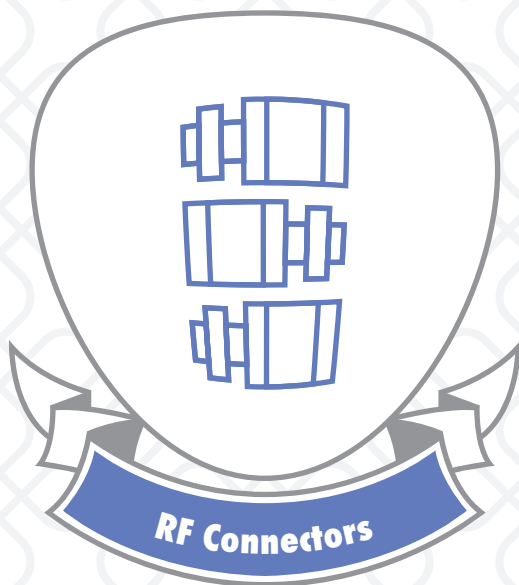

Programmable Power

All the power supplies you'll ever need are available from just one supplier:-

POWER SOLVE

Tel: 01635-521858 Email: sales@powersolve.co.uk

COAX Connectors **59**

- Ⓢ Manufacturer of 50 & 75 ohm high performance RF Connectors
- Ⓢ Bespoke connector design
- Ⓢ Cable assembly service
- Ⓢ Widest range of 12G 75ohm connectors

Quality - Performance - Reliability

Advanced Rework
Technology **61**

Advanced Rework Technology Ltd

As an Authorized Training Center, A.R.T Ltd can offer Certified Training to the IPC Standards listed below. A.R.T Ltd are the only training center in the UK able to offer CID PCB Design and IPC-6012 training and Space Addendum training for J-STD-001 and IPC-A-620.

Acceptability of Electronic Assemblies

Requirements for Soldering Electrical and Electronic Assemblies

Repair Rework and Modification of Electronic Assemblies

Requirements and Acceptance for Cable and Wire Harnesses

Qualification and Performance Specification for Rigid PCB's

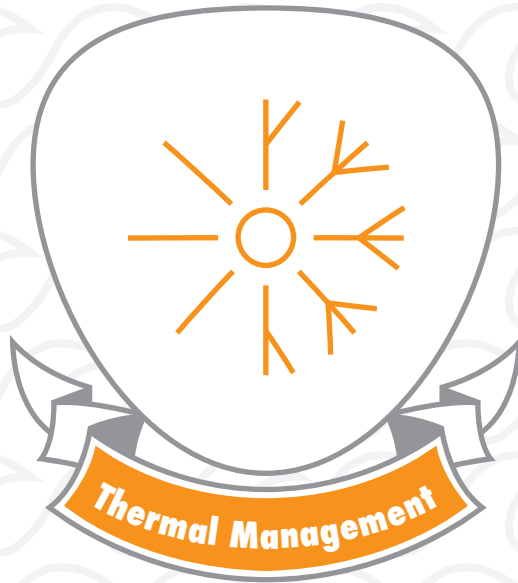

Acceptability of Printed Boards
